

Dr. Steven Greer statement / press conference Barcelona, July 24, 2009

Good Evening,

My name is Dr. Steven Greer and I am honored to be addressing you about this very important subject. I am an emergency and trauma physician, but have left my medical practice because I felt my most important duty now is to the environmental and diplomatic crisis facing planet earth.

My first encounter with the Extraterrestrial visitors was seeing a "UFO" as a young boy.

This engendered great interest in the subject which only increased when my favorite uncle became one of the designers of the lunar module whose 40th anniversary landing on the moon was just celebrated.

In order to promote a scientific study of the subject of UFOs, and to make open, peaceful diplomatic contact with these Visitors, I have founded CSETI – The Center for the Study of Extraterrestrial Intelligence and its special project The Disclosure Project.

I have also founded 2 organizations to develop and bring out alternative energy sources: The Orion Project.org and Advanced Energy Research Organization.

In May 2001 we hosted at the National Press Club in Washington DC about 20 military, government and corporate witnesses from the more than 400 witnesses The Disclosure Project had identified. They related their experiences with Extraterrestrial craft and beings and disclosed how secrecy has been illegally maintained for over 60 years. A DVD of that event is available.

At the time it was the most watched event in the history of the internet and was reported world wide, reaching more than 1 billion people. This has launched the world-wide Movement for Disclosure, which has led in part to this conference in Spain.

In my book "Disclosure" 69 of these witnesses relate the events they had seen - many of them multiply witnessed and some with physical evidence such as radar tapes. These courageous individuals relate how they were intimidated with everything from ridicule to death threats.

That we are not alone in the universe is now a scientific given. In my discussions with US, European, Vatican, Canadian and other leaders around the world, a growing consensus exists that we have been visited and the time for disclosing this information is long past due.

Admirably, much has been done by the governments of Europe to advance the cause of Disclosure. The French, British, Danish and Irish have opened many of their files as have other governments around the world.

The US, with the world's largest military and industrial complex, has been reluctant to end the secrecy on this matter. We hope this is about to change. To that end, I have provided briefings to figures very close to the new Obama Administration and key members of the US Congress.

I have met with and provided briefings for many senior military and government officials around the world, including a sitting CIA Director in the United States, the head of the Defense Intelligence Agency and the Director of Intelligence, Joint Chief of Staff of the US, among others, and many members of U.S.-Congress.

In every case, these senior officials had been denied access to the illegally run, rogue projects dealing with UFOs in the US and were in favor of Disclosure.

Because of this misguided secrecy, the wondrous new sciences related to advanced energy generation, propulsion and transportation have been withheld from the people. These advances include the generation of limitless clean energy from the so-called zero point energy field and quantum vacuum flux field from the space around us, and propulsion that has been termed (incorrectly) anti-gravity.

The field of electromagnetic energy that is teeming all around us and which is embedded within the fabric of space/time can easily run all of the energy needs of the earth – without pollution, oil, gas, coal, centralized utilities or nuclear power.

We urgently need a global initiative to make peaceful, open diplomatic contact with these Extraterrestrial visitors. It is clear that they are completely non-hostile and are awaiting an appropriate, non-militarized approach to them.

[3]

This has been the primary focus for CSETI for 19 years- a time in which we have made great strides in making open contact, as you will see during this conference.

While non-hostile, these visitors appear to be very concerned with unchecked human hostility, war-making and weapons of mass destruction, combined with our early potential for space travel.

The tendency for people to engage in anthropocentric projection leads many to assume a threat where none exists. It is more likely that humanity may be seen as a threat to the cosmic order, insofar as we have failed to restrain the expansion of weapons of mass destruction while attempting to push farther and farther into space.

If these visitors were a threat they could have destroyed us years ago with their advanced technologies. They have been very patient and it is up to us to reach out to them in peace. For this reason, we must immediately de-weaponize space and vow to make open peaceful Contact with these Visitors.

All of us here need to accept our responsibility to move forward with Disclosure and to initiate an enlightened and peaceful diplomatic mission to these extraterrestrial visitors.

Once we vow to live peacefully on earth and go into space only in peace, we will be welcome with open arms. The benefits to humanity will be boundless.
